Widow Takes Witness Stand Tells Of Husband's Work, Habits

Her husband said worked as a regular practice to cross the bridge each day. She testified that her husband was a driver-alesman where he remained until the date of the accident.

At the time of his death she said he was the owner of a 1950 Pontiac sedan, which he drove to and from work each day.

After dinner he worked in the garden until he left for the drug store. He did not give the impression of being in a hurry she said.

Exhibit four was entered, the certificate of presumption of Mr. Thomson's death. Mrs. Thomson testified her husband made \$295 a month and that he cashed his pay cheque and handed the money to her. She said they had a joint checking account which had \$10 in it the day he died.

Mrs. Thomson said a \$3,000 mortgage was owing on their home when her husband died. They also had a loan from the bank. She said her husband had sent for a TV technician's car. She said he was a good father to the children, never drank, smoked and had only one suit since his marriage. Her own plans for the future are to keep her home and to educate her children.

Mr. Gray had Mrs. Thomson confirm her previous statement that her husband completed Grade IX in Alberta and that it

Canada Did Poorly At Innsbruck Games

The winter Olympics are over and Canada has not much of which to be proud. This country breeds no hockey players in abundance but in its development of premier experts of other winter sports it lags behind what its climate warrants.

Bauer's Babes hockey team finished with five wins and two losses for ten points, the same record as Sweden and Czechoslovakia. But the Canadians had a poorer record in the scoring column and so ended up fourth. While this was about the worst showing ever made by a Canadian hockey team, Bauer's Babes did accomplish one thing: they enhanced the Canadian image. In other years the Canadian team has been the centre of squabbles and charged as poor sports. This was reversed this year and it was pleasant to hear the crowd pulling for the Canadians instead of booing them.

For many months of the year Canada is a winter land, excepting only the west coast a place of ice and snow, from which it would be natural to assume that one Olympic winter athlete would gain high standing in competition with other nationals.

Unfortunately such is not the case. At the close of the winter Olympics, the point standings showed Canada to be far behind most of the nations competing. We placed 11th, Russia leads the parade taking 11 of the 34 gold medals, eight silver and six bronze. Canada took one gold medal and three

bronze for a total of 24 points. Oddly enough our one gold medal came in four-man bobsled, which we entered for the first time. Following Russia in the standings were Austria, Norway and Finland, France and Germany.

For what consolation it may bring Canadians, its big neighbor to the south fared little better than we did. The U.S. took only one gold medal, two silver and three bronze.

Population, size, does not tell the story of why Canada finished so far down the list. Finland, Austria, Norway, each has fewer athletes to draw from than this country.

Knowing the geographic location of this country, European must wonder at the inability of Canadians to make a better showing in the winter Olympics.

The fault does not lie with Canadian athletes, whose potential is equal to that of other nations, but in lack of official encouragement and training facilities. This is an old story, and it contrasts sharply with the state-aided programs which enable European competitors to shine so well.

Watching the winter games as they progressed one is forced to wonder what happened to the \$5 millions fitness and sports council created more than two years ago to improve the chances of Canadian athletes. The Innsbruck Olympics do not suggest it has been of much help.

Faulty Conclusions

(The Printed Word)

In the last generation there has come a belief in market surveys. These may not always be justified because, along with some of the office machinery, the right answer cannot come out if the wrong facts are put in.

Probably the greatest error ever achieved through market surveys was one that resulted in several North American manufacturers of motor-cars building cars that were too large for private garages. There was no provision for the bargain-basement vehicle and no consideration of the fact that the man who said he would like a big car might not be able to afford to have it and knew that he could not have it.

There were cars of every color in the spectrum. The consumer had the widest possible choice, except that he did not have the choice of a car that could be stored in a garage big enough for a 1937 Cadillac but not big enough for a 1958 Chev. As well expect a shoe manufacturer not to provide for the small foot.

Perhaps the error in this marketing survey was that many people placed their wishes ahead of their needs. Most people, it would seem, would like a big car. A big car is a status symbol, but there are many people who cannot afford, or do not wish to pay for, a mere indication of a yearning for a higher status, economic and social.

Outside this field of automobiles and other outward evidence of position, it could have been that the respondent, if questioned secretly and privately, would have said that he would like a different kind of wife. It

is certain that most wives are dissatisfied in some degree with husbands. It is certain that most women would like to have a mink coat. But circumstances impel them to buy something less costly, and the furrier so far has not been so insensitive to the market that he stocks in his emporium nothing but minks.

Among the younger families, it is probable that husband and wife would agree that a much larger home would be nice. But the husband may think of the cost and the wife may think of the work, so that when it comes to buying a house they settle for less than a market survey would indicate they wished.

The problem of the smaller car, in width and fore-and-aft measure, seems to have been quite satisfactorily solved, but there is still a problem of getting in and out of vehicle where the roof seemingly is lower than the floor. Almost any day now there may be an irresistible protest from women. Consider the case of the wedding guest. She spent most of an afternoon at a hairdresser's. The next day she spent fifteen minutes getting the new hat at the right angle. Then she paraded to the limousine. In entering it she knocked the hat skewer and most of the effort of getting ready for the wedding was wasted.

In England some of these things are done better. A man wearing a silk topper can sit in a London taxi-cab.

People who are getting on in years and those who perhaps have not succeeded in their reducing exercises need more than a little help in getting out of the cars with the low roofs.

On The Beatles

Having seen — and heard — the Beatles on the Ed Sullivan TV show on Sunday, we feel something of shame for England for having produced them. And, too, real shame for the United

States which provided that hysterical audience.

The whole Beatle episode — surely a sad commentary on our times.

"Money isn't everything," as everybody says, and if inflation continues to build up, it won't be long before money will be scarcely anything.

"LET'S FACE IT, LBJ—FROM THAT ALTITUDE HIS COULD
BE A MORE FAR-REACHING VIEW THAN OURS"

Epic Of Leningrad Siege Failed To Make Headlines

LENNINGRAD (AP) — At the time the Japanese bombed Pearl Harbor, people of this city were eating bibles, dogs, cats, rats, grass, glue, pine needles — anything at all to remain alive in one of the worst sieges of modern history.

Now, 20 years after it ended, the city commemorates the hour that the German blockade was broken by attacks from within and from outside. Before the blockade ended, a third of the population had starved to death, 62,253 people by official count. Disease had little part in it. They starved. Dying cold and alone in bed, falling by night in the snow in the streets, or on the threshold of the factories they tried to reach to perform their daily tasks and earn their ration cards. To the people who survived, it seems incredible now that they did it.

The Germans, blocked by the Finns, threw a blockade around Leningrad in the cold fall of 1941 and twisted it so tight that for weeks and months all but the thinnest trickle of food was shut off.

Finally a thin dribble of food, gasoline and other supplies began coming in over a road across the ice of Lake Ladoga, where the Russians held a narrow beach head. The story of suffering, disaster and sheer

human determination. To the Laid with starving people being evacuated across the ice in the night, planked through routes of people onto ice water from which they were too weak to scramble. Survivors around them were too weak to pull them out.

That is how it was. I came here to take pictures of the people who had come through it. The story of that siege, known to every Russian, hardly saw the light of day in the West during the war. A certain amount was written about it, but what chance had it to make the front-page of the world's newspapers against the dramatic battle of London, the sinking of the American fleet in Hawaii, the entry of the United States into the war.

Not since the German siege of Paris in 1870 had a great world city suffered a hunger siege. Hitler announced his intention to starve Leningrad into surrender, then to obliterate it.

PLAN CHANGED
The Germans, swept almost into the city in mid-September, 1941. At the last minute, the plan was changed.

There is controversy about that. Soviet authorities insist Hitler was beaten at Leningrad, gave up trying to invade the city, and set about starving it.

Much evidence points in another direction. At the close of the war, after the fighting swept across Europe, German troops stopped with early night of the city. Its exhausted cathedral leaders, at that hour, the situation seemed hopeless. The city was withdrawn and sent across the ice to a safer haven.

But the longer siege lasted, and the harder it was. Leningrad was finally captured in January, 1942, and the city was held for a time. The city was then shipped to a neutral country, and the city was held for a time. The city was then shipped to a neutral country, and the city was held for a time.

When the Leningrad army finally closed in on the city, the city was held for a time. The city was then shipped to a neutral country, and the city was held for a time.

Officials rapidly set rationing. The army at the front had to be fed first.

BOILED COWHIDE
An employee of Industrious, who was 14 at the time, said his grandfather once returned with a cowhide.

"We boiled the hair off, then grandmother took it for hours on the little stove. We all had a bowl of soup. When it was cooled we ate it. I thought it was very good. At least it seemed so then."

"Every morning when we went out, there were dead people in the streets," he said. Other survivors told the same story.

Finally a truck route across the ice of Lake Ladoga was worked out, but it was a constant hazard. The Germans shelled the road and bombed it.

The route had to be changed often and it was a heavy, for huge snowdrifts had to be moved. It was almost impossible to find people with strength enough to stay out on the ice to shovel away the snow.

Among the relics of the Leningrad siege is a tiny diary of a 15-year-old girl, Tanya Savichev. It is no Anne Frank diary. It records only death.

The little notebook had an alphabetical index, like a small dictionary. Under the Russian letter for J was a record of the death of a sister. It was written with a thick blue crayon.

"Jenia died 28 Dec. 12:30 in the morning, 1941."

Under it was Babushka, grandmother, who died Jan. 25, 1942.

Then went an uncle, another sister. Under the M was: "Mama, 13 May at 7:30 morning, dead, 1942."

Later came a page saying simply: "All dead."

Finally, under the letter O was "Odnia," for alone, in Russian. Her cold hand had scribbled: "All alone, Tanya." There was no date.

Neighbors found her later, starving. She died crossing the lake in an evacuation convoy.

Despite their suffering, the Leningraders managed to send men to the front and support them with munitions.

In 1943, the Germans planned one more attack on Leningrad, but it was broken up by a preventive attack by the Russians. Late in 1943 a Russian breakout attack was launched from Leningrad itself, supported by an attack from outside, south of Lake Ladoga.

The Germans were sent reeling back and the first relief troops broke into the city Jan. 27, 1944, to a widely exulting population.

OTTAWA REPORT

Foreign Ambassadors Really Have A Ball

By PATRICK NICHOLSON
Daily Courier Ottawa Bureau

When official Ottawa has a ball and goes on its winter, the ambassador who are responsible with the attending state and cultural events of Ottawa, while even our prime ministers remain unimpaired from the winter in their undisturbed ball.

This is the effect of the old Ottawa ball, but against any ball, even Canada, saying "Thank you" in the world-wide accepted way of bestowing a decoration on Canadians who perform services beyond the national call of duty.

But in fact Parliament Hill is a regular ball and I was happy to observe a ball in the last month of the year, and looking forward to the winter ball and the winter ball.

And some literary ballads with the Canadian ball. It is a regular ball and I was happy to observe a ball in the last month of the year, and looking forward to the winter ball and the winter ball.

CANADIAN ORDERS

The Canadian ball, but against any ball, even Canada, saying "Thank you" in the world-wide accepted way of bestowing a decoration on Canadians who perform services beyond the national call of duty.

Nothing is so common as a Canadian ball, but against any ball, even Canada, saying "Thank you" in the world-wide accepted way of bestowing a decoration on Canadians who perform services beyond the national call of duty.

Nothing is so common as a Canadian ball, but against any ball, even Canada, saying "Thank you" in the world-wide accepted way of bestowing a decoration on Canadians who perform services beyond the national call of duty.

How crazy is this dignified? One Canadian may not accept an honor which another has accepted. George Flettner, a prime minister, says that a cabinet minister may not accept an honor which that prime minister has accepted. The governor general, has already accepted and wears such pride.

There are three Canadian who have been sworn into the office as prime minister. All three have maintained the dignity that Canadians may not accept a title from the head of any nation which is not a Canadian. The governor general, has already accepted and wears such pride.

WIDOW ARRIVES TO TESTIFY

Mrs. Marna, widow of a man who was killed in the explosion of the ship, has arrived in Kelowna to testify before the coroner's jury.

IODE Celebrates Birthday Thursday

The International Order of the Daughters of the East (IODE) celebrated its 50th birthday on Thursday. The organization, which was founded in 1894, has a membership of over 100,000 women in Canada and the United States.

Activities in the IODE include social, educational, and charitable work. The organization has been successful in raising funds for various causes, including the construction of schools and hospitals.

The IODE is also active in promoting the welfare of its members and their families. It provides a wide range of services, including financial assistance and counseling.

The IODE is a non-profit organization and its funds are used exclusively for its charitable and educational purposes. It is a member of the United Way and the Canadian Red Cross.

The IODE is a proud member of the United Way and the Canadian Red Cross. It is committed to the welfare of its members and the community at large.

TELESCOPE SILHOUETTE FOR SPRING

New Kilpatrick employed his new telescope silhouette for spring 1964 in this costume designed for dining out at restaurant places. Made of a brown, black and white ray-printed silk, the long bod-

ied dress is doubly flounced at the hemline. The waistline may be accented with a matching sash or worn as pictured. A slim, matching coat is buttoned in front from top to bottom.

WCTU Slaos Cocktail Bars

VANCOUVER (CP)—The old corner saloon was bad enough, says the Women's Christian Temperance Union, but now it's fighting a far more "insidious enemy"—the cocktail bar.

Cocktail bars are far more insidious than the old saloon ever was, says Mrs. William Watson of Vancouver, world recording secretary for the WCTU. "More people are drinking socially today, especially the women, and these bars are springing up everywhere in Canada just encourage this."

But if the enemy has changed, its shape, so has the WCTU's approach to the fight. "Hatchlings" as Carry Nation called her hatchet attacks on the old saloons in the United States—have long been supplanted in the WCTU warfare by something the organization considers more effective.

"Our education program, particularly among the young, is the best answer," says Mrs. Watson, whose organization in Canada distributes films, pamphlets and other publications in an attempt to curb drinking. "CANT HAIT DRINKING."

"There is no doubt that social drinking is on the increase. It has become acceptable among many Canadian women. These people just don't realize that alcohol is the enemy that is potentially habit-forming."

Yesterday's Answer

YOUR HOROSCOPE

FOR TOMORROW
Mixed planetary influences make this a day in which job interests should advance considerably, but where great caution must be exercised in financial matters. Do avoid extravagance and speculation. An excellent period in which to gain favors from superiors.

FOR THE BIRTHDAY
If tomorrow is your birthday, your horoscope indicates that as of last week, you entered a cycle highly favorable for furthering financial goals. This good period will last until the end of March, and you can expect a further upswing along these lines in mid-June; still another lasting throughout October and November. Do be conservative in monetary matters during April, May and September, however.

Where job matters are concerned, the period between now and late March will be as generous as it is in monetary affairs, with promise of recognition for past efforts in mid-April, other opportunities to advance in September and November. Personal relationships should prosper for most of the year ahead, and according to the stars, late March (an all-round good period for Aquarians), mid-June, September and December will be highly propitious for romance. Travel and social life could both prove stimulating in May, July, August, November and December. A child born on this day will be extremely bright and will handle responsibilities very well, but will have little or no regard for the conventions.

EVER HAPPEN TO YOU?
